

Markleeville Community Transportation Plan Summary

Background

In April 2022, Alpine County Local Transportation Commission was awarded a Caltrans Sustainable Community grant for the Markleeville Community Transportation Plan.

Objective

The Markleeville Community Transportation Plan creates a strategic vision for the State Route 89 corridor through historic downtown Markleeville and connecting roadways to surrounding neighborhoods and public lands. The Plan aims to establish a long range vision for multimodal transportation improvements that will:

- Improve the quality of life for local residents;
- Strengthen the local economy;
- Increasing active mobility options in the community; and
- Preserve the natural environment.

Ideas Being Considered

The plan is looking at the following improvements to increase access and safety in downtown Markleeville:

-  Increased access and wayfinding to existing Markleeville destinations and parking lots
-  Pedestrian improvements along SR 89 and Montgomery Street
-  Improved pedestrian crossings of SR 89
-  Improve safety for drivers, bikers, and walkers

Schedule and Timeline

Once the plan is adopted, the County will be able to pursue competitive transportation grant funding for future design and construction. When funding is identified, additional community input will be sought on the elements of the design.
